

# Prize

## Competition 2005

DKK 100,000

The objective of the Radiometer Prize for Scandinavian Research within Anaesthesiology and Intensive Care Medicine is to promote research within anaesthesiology (anaesthesia, intensive care, pain treatment and resuscitation and pre-hospital care), particularly within analytical methods, diagnostics and patient treatment.

The Prize winners will be selected on the basis of a competition arranged in connection with the 28th Bi-Annual Congress of the Scandinavian Society of Anaesthesiology and Intensive Care Medicine in Reykjavik, June 29 – July 3, 2005.

Researchers or research groups in Scandinavia, who wish to participate, are requested to submit anonymously an abstract of a recent scientific work with a maximum length of 1,000 words and not more than two illustrations. The work must not have been published before. Abstract and a letter stating the name of the author(s), which must be received by February 1, 2005 at the latest, should be addressed to:

Dr. Carl C. Holbek, Scientific Advisor  
Radiometer Medical Aps  
Åkandevvej 21, DK-2700 Brønshøj, Denmark  
Tel.: +45 3827 3386; Fax: +45 3827 2727  
E-mail: carl.holbek@radiometer.dk

In February 2005, a Scandinavian prize committee will select up to three works among the contributions submitted, to be presented by the authors at the 28th Congress of the Scandinavian Society of Anaesthesiology and Intensive Care Medicine. The speakers will be reimbursed all expenses for congress participation, travelling (within Scandinavia), and accommodation. Research groups are, therefore, kindly requested to name one representative of the group who will present the group's work, if selected. The individual presentation should not exceed twenty minutes followed by a free discussion.

The three works presented will be offered (optional) publication in the *Acta Anaesthesiologica Scandinavica*.

Based primarily on the scientific value of the paper, but also on the oral presentation at the congress, the prize committee will award a first prize of DKK 60,000, a second prize of DKK 30,000, and a third prize of DKK 10,000.

*The Radiometer Prize was founded in 1994 by Radiometer Medical A/S, Denmark, in recognition of the 40-year anniversary of the first Radiometer apparatus for determination of blood pH and pCO<sub>2</sub>, developed in co-operation with Professor Poul Astrup, Denmark. The Prize in 2005 will be the last one.*
